[**Pancake Parlor**] go to the steering wheel on minimap, deploy stingray (vehicle) Once you're in one, find some weak enemies (across the nearby bridge there is a small building to the left, enemies will spawn there) then (CONTROLS ARE REVERSED PS3/PS4) hold L1/L2(BOOST) to float up and R1/R2 (slam) down on top of them.

[**360 No Scope**] EQUIP pacifying Sniper , in the building you spawn there is a room with mobs and a jump pad shoot the box next to jump pad. it will launch you to high platform, then DOUBLE JUMP down whilst airborne spin 360 degrees then kill without using the scope. should be easy as your sniper is OP.

[**The Duelist**] Win a duel. You can use a second controller or a friend/online. Melee each other to get started (make sure you have Duel Requests set to "On" in the Options menu)

[**That Tasted Purple!**] EQUIP all slots with purple or yellow gear.

[Mouth To Mouth] Use a second controller, sign in as guest, use a blank level 1 character, both of you go in to the room with mobs, level 1 char will die very quickly, just keep reviving WITH OXYGEN [TRIANGLE]

[Moxxi's Sampler] use "travel" and go to Concordia. enter moxies bar (in front of you towards right, use jump pad) in bar you will find drinks that cost currency, drink/buy all of them

PRESAV21

[The Bigger They Are] Complete active quest, (even with modded guns etc this guy isn't "easy" I suggest either using the max level version or waiting for people to join)

PRESAV22

[Moon Mission Meister] turn in active quest

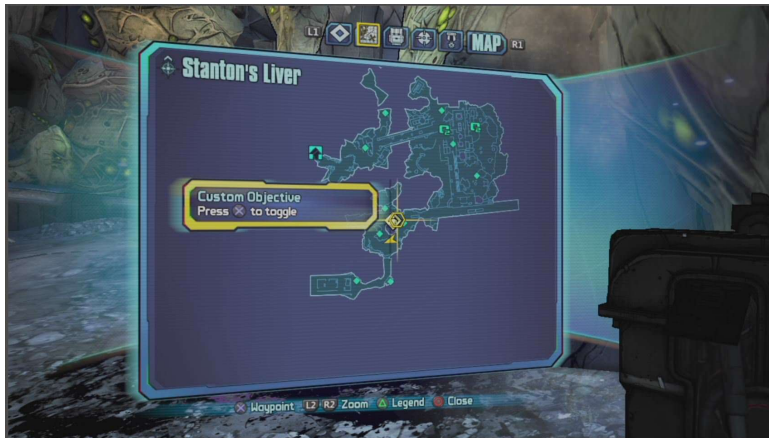

PRESAV23

[Challenger] go to steering wheel, spawn a MOON BUGGY teleport inside, find an enemy and kill it with R1/R2.

PRESAV24

[Ice To Meet You]

go to the right side of the map (see pic).

There are Cryo Vines, get Torks to follow you around and run by the Cryo Vine, it will freeze the Torks, simply do a slam attack when 3 are frozen (kill other mobs as they stop torks attacking you) reload if enemies run out, may take a few tries but this is the best method.

[The Gun In The Stone] Loot the gun located along a path to the left BEFORE you cross the bridge. there will be a small arrow pointing and you have to jump across the path. You must have a Badass Rank of 2,500 to pull it out

PRESAV25

[Collateral Damage] Directly in front of you there will be a room with a dahl cannon, destroy it, then find the "lost legion Eternal" in the room in front of you - melee him(don't kill him) and hope he turns to a Magus Eternal. If he doesn't then save, quit and reload and you will be back at same spot. Just have the Magus Eternal hit the enemies with the slag orbs he shoots at you and he will kill the enemies. You may need to soften up the enemies ONLY if they have shields, again melee you don't want to kill them yourself.

PRESAV26

[Lunar Looter] go to the Redbelly boss fight in the complex ahead of you. at the boss fight go up the stairs and there will be a box that costs 40 moonstones to open, open and pop.

PRESAV27

[That Helped, Right?] just progress until you find an enemy then use special action skill to kill an enemy

PRESAV28

[Who Needs Air?] DO NOT OPEN o2 PILLARS. shoot whenever you are low on health, it will heal you. after 5 minutes it will pop.

[Executioner] keep following the map until you see some scavs, at this point there will be many torks and scavs, activate your special skill and kill them all.

PRESAV29

[No, I'm Athena!] walk up to the torks and use your special action skill (twice to throw it)

PRESAV30

[Air Supremacy] walk up to the torks and use your special action skill

[Space Lord] just keep making your way around the map with your special skill until it pops

YOU SHOULD ONLY POP 2 OF MAP01-03 TROPHIES AND THEN POP MAP04 IN ORDER FOR THE LAST MAP TROPHY AND ALL MAP TROPHIES TO POP TOGETHER AS THEY WOULD LEGIT.
